Davrbank

Middle QA Engineer

- Performing end-to-end functional, integration, and regression testing of web and mobile banking modules (Loans, Deposits, Cards, Payments).
- Designing, maintaining, and executing manual and automated test cases for both frontend and backend components.
- Conducting API testing of microservices using tools such as Postman/REST Assured and validating responses against business requirements.
- Analyzing and clarifying business requirements to create comprehensive test plans, test scenarios, and test data.
- Logging, tracking, and verifying defects using an internal issue-tracking system (e.g., Jira).
- Performing cross-browser and cross-platform testing to ensure consistent user experience.
- Collaborating closely with developers, product owners, and business analysts in Agile/Scrum ceremonies.
- Contributing to the test automation framework for UI and API layers (Java + Selenium/TestNG/RestAssured).
- Writing SQL queries to validate data consistency in PostgreSQL databases.
